Palak Srivastava

Aspiring AI & Data Analyst

+91-8889913728 palaksrivastava0407@gmail.com LinkedIn GitHub

Summary

Motivated B.Tech student with strong interest in Artificial Intelligence, Machine Learning, and Data Analysis. Skilled in Python, SQL, and problem-solving with hands-on project experience. Quick learner with strong analytical thinking, communication, and teamwork abilities, eager to contribute in data-driven environments.

Skills

Programming & Querying: C, Python, SQL
Core Concepts: Machine Learning (Basics), DBMS, Data Analysis
Tools: Git, VS Code, Figma, Canva
Soft Skills: Problem Solving, Communication, Teamwork

Projects

Fresh Hired – AI Job Recommendation System | *Python, ML* | GitHub

- Developed an AI-based system to match resumes with relevant job roles using machine learning techniques.
- Improved recommendation accuracy through skill-based filtering and keyword matching.
- Integrated job trend insights to enhance recommendation relevance and usability.

Loan Default Prediction System | *Python, ML* | GitHub

- Built a predictive model to identify loan defaulters using real-world peer-to-peer lending data.
- Handled imbalanced datasets using precision, recall, and F1-score.
- Enhanced model performance through feature engineering and tuning.

Women Empowerment Index Analysis | *Data Analysis* | Report

- Analyzed data for 12 countries (2013–2023) using statistical and time-series techniques.
- Applied normalization and correlation to compare economic indicators.
- Generated insights to identify regional patterns and trends.

Fitness Tracker DBMS | *SQL*

- Designed a normalized database system for efficient storage and retrieval of fitness data.

Awards & Certifications

- Infosys Springboard – Programming Fundamentals
- Red Hat – Linux & System Basics
- IBM – Introduction to Cloud Computing
- Microsoft Copilot – AI Productivity Tools

Coding Profiles

LeetCode — HackerRank

Extracurricular Activities

- Participated in hackathons including Smart India Hackathon (SIH).
- Coordinated and managed college events and student activities.

Education

B.Tech Computer Science & Engineering (Artificial Intelligence) **2024 – 2028**
